Meeting Notes	

Meeting Summary

The ASTG members met to complete Post Plant Gradation Work Product Group and 10% RAP in RHMA-G Work Product Group.

Post Plant Gradation

The WPG is moving along and meeting milestones established in the scoping document.

10% RAP in RHMA-G

The WPG is encountering difficulty in securing plant mixes (Control-0% RHMA-G and 10% RAP in RHMA-G) to complete the Testing Plan milestone. The group has already extended the Testing Plan milestone by 3 months and is reaching out to STG and ATG in securing these plant mixes.

STG suggests using laboratory produced mixes instead of plant produced mixes.
