

Implement a
Safe System
Approach

Caltrans Division of Safety Programs presents ...

Double Down
on What
Works

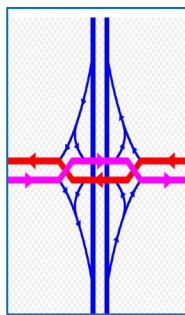

INTERSECTION Safety and Operational Assessment Process (ISOAP) *a Safe System Approach to identifying the best solution / investment*

Featuring Opening Remarks by Rachel Carpenter, Chief Safety Officer

Presentations by John Liu, District 6 Deputy Director – Operations & Maintenance; Jerry Champa, HQ Division of Safety Programs, and Special Guest: Phil Rust, City of San Diego on Affordable, Quick Build Solutions

Target Audience: Project Planning & Delivery practitioners & managers; System Performance Managers focused on safety & mobility goals

This webinar will provide an overview of the update to the *Intersection Control Evaluation* or ICE policy directive, which has been renamed to increase emphasis on the safety performance of intersection traffic control alternatives to help identify the optimal solution during ISOAP's project screening and comparative analysis *steps*. This webinar will also emphasize streamlining and other efficiencies offered by ISOAP, as well as the numerous advantages produced by innovative and Safe System intersection strategies, especially implementation time & cost savings.
