District 08 Mobility Performance Report

2024 Quarter Four

EXECUTIVE SUMMARY

Overview

Caltrans District 8 covers approximately 28,650 square miles of land, making it the largest district in California. District 8 consists of two counties: San Bernardino and Riverside. Both counties are in Southern California and part of the Inland Empire. Riverside County has an estimated population of 2.5 million residents while San Bernardino County is estimated at 2.2 million residents. With a total of 4.7 million residents, District 8 comprises of twelve percent of California's total population.

The quarterly Mobility Performance Report compares the data from the current quarter with over a year ago as well as the previous quarter, for the following performance measures:

- Vehicle Miles of Travel (VMT)
- Vehicle Hours of Delay (VHD)
- Lost Lane Miles (LLM)

- Delay by County and Route
- Detector Health
- Bottleneck Locations

Vehicle Detector Stations installed on our freeways are strategically placed throughout the district and are collecting data. The MPR uses the data collected from these stations through Caltrans Performance Measurement System (PeMS) to produce this report and conduct traffic studies. This report presents congestion information at two speed thresholds: delay from vehicles traveling below 35 miles per hour (mph), and delay from vehicles traveling below 60 mph. The 35-mph threshold represents severe congestion, while delay at 60 mph represents all congestion. These thresholds are set by Caltrans and are based upon engineering experience and District input.

FINDINGS

Vehicle Miles Traveled (VMT) in District 8 during the fourth quarter of 2024 was 5.51 billion miles, which was a 2.0 percent increase when compared to VMT from a year ago and a 1.0 percent increase from the previous quarter.

In the fourth quarter of 2024, at the 35mph speed threshold, San Bernardino County exhibited 1.57 million vehicle hours of delay followed by Riverside County at 2.0 million. Total delay in District 8 equaled 3.6 million VHD for the 35mph speed threshold. This was a 9.1 percent increase from the previous quarter, and a 11.5 percent increase when compared to the same quarter over a year ago. For the 60-mph speed threshold, during the third quarter of 2024, total delay equaled 9.4 million VHD, which was a increase in delay by 7.2 percent from last quarter and a 8.5 percent increase in delay for the same quarter over a year ago.

The busiest day of the week as far as congestion for the third quarter of 2024 was Friday with 150,000 hours of delay for speed under 60 mph followed by Thursday at 143,000 hours of delay.
